Where do you believe additional public access should be provided?

I am concerned about the word "additional." I know we need to do this. It would have been great to have you all and the judge enjoy a Saturday or Sunday afternoon on the Pond to see how it is already overcrowded. It is already crazy with underage kids riding jet skis and I am sure with no insurance, and these huge wake boats that are doing damage to docks. Not to mention, there has been research that these big boats are doing damage to the bottom of the pond and someone posted that there is a link to the algae. We no longer go out on the weekends; it is too scary. This is going to be a nightmare. The judge said we need to give them access. Parking for 10 cars and 4-5 trailers is already too much...

---

Where do you believe additional public access should be provided?

Multiple points of public access. With ample parking for trucks boat trailers and an area for recreation. Land could be obtained through eminent domain of some of the properties around the pond.

---

What types of future potential recreational uses or facilities would you like to see (please select all that apply)?

Motorized boat launches, Fishing piers, Shoreline boardwalk, Picnic areas, Parks, Hiking/biking trails, Parking facilities, Trash receptacles

---

What should be the highest priority for investment along the Pond (please select one)?

Boating access

---

Where do you believe additional public access should be provided?

In the 3-17-26 version of the "CONCEPTUAL DESIGN FOR PUBLIC ACCESS - JOHNSON'S POND DAM PROPERTY", the area at the bottom of the diagram along the dam that says "Proposed Trail Continuation to South" - if this trail can extend all the way to Reservoir Road so there would be fully walkable access between these two areas, it would provide a badly needed bridge between two seemingly close, yet unconnected areas, and would be incredibly beneficial to have. Adding this trail would allow more people public access to the pond itself, the Library, and Washington Trail from Wood Estates North and surrounding areas. It would allow more people who live near Johnson's Pond (but not on it) to enjoy having someplace to finally walk to, and SIT, instead of just "taking another walk around the block looking at the pond from afar with no allowable place to stop". There is currently no public place for simply stopping to view a sunset at the pond or take in the nature we're surrounded by in this area. If even a small seating area can be added to the Reservoir Road side / made available to overlook the water or slip in a kayak, this would be a huge, welcome change for a residential area where there's otherwise no recreational space. It would be a substantial quality of life improvement for those of us who are not fortunate enough to live on the pond to finally have a place to stop and simply sit. It is very frustrating to be so close to the pond, support it and not have any local, walkable access. All residents deserve to take a walk and sit by the pond even though we don't have pond access on our properties. Walking and being near water makes people healthier and happier, and this would foster a slower sense of community. Thank you for your time and consideration with this request. Looking forward to seeing what comes from this!

What types of future potential recreational uses or facilities would you like to see (please select all that apply)?

Beaches, Hiking/biking trails, Viewing areas/overlooks, Shoreline boardwalk, Small, non-motorized boat launches, Parks, Trash receptacles

What should be the highest priority for investment along the Pond (please select one)?

Shoreline access

Where do you believe additional public access should be provided?

AT THE DAM. Build trails connecting places, and if boat launches are too expensive, at least give residents a place to walk and sit. Add connections across areas of the pond with a bench or two to enjoy the view in legal areas. Do the wetlands trail and trail south down across the dam. Make a beach so people can swim even if we don't add more boats. If we do add boats. make it non motorized like kayaks and paddleboards to help the environmental concerns.

---

What types of future potential recreational uses or facilities would you like to see (please select all that apply)?

Viewing areas/overlooks, Beaches, Hiking/biking trails, Trash receptacles

---
